

COFFEE MODULE

SAVE UP ENERGY & BREW LESS GUILTY COFFEE

Depending on usage, save up to 90% on energy consumption compared to a traditional machine setup.

FULL BREWING CONTROL

Build custom recipes for different coffees or flavour profiles and control, measure and change the essential brewing parameters; temperature, flow and pressure. The Induction **Temperature Control** allows you to brew coffee at any temperature ranging from 40-97C, and you can also create temperature profiles with diverse starting and ending temperatures. Heylo Coffee Module also features the **Flow & Pressure control**, which allows you to brew coffee based on a water flow rate or different pressure stages. Moreover, the **Smart Alarm** will let you know whether your recipe needs adjustments.

PLUG AND PLAY

Anyone can install a Heylo Coffee Module, just plug it in, connect it to water, and you are ready to play!

SUPPORTING YOUR BUSINESS

Thanks to Heylo's flexibility, you can freely customise the workflow following your needs and habits. Every module is a standalone solution; choosing Heylo decreases the risk of having your entire coffee bar out of order. Heylo's modular design will help you find new business models; why not try a new breakfast or coffee delivery business? With Heylo, your coffee travels! Furthermore, our Coffee Module is telemetry ready.

TECHNICAL DATA SHEET

MODULE DIMENSIONS	W: 397MM * D:430MM * H: 375MM
BOX DIMENSIONS	43 X 44,5 X 46 CM
NET WEIGHT	23 KG
PACKED WEIGHT	27 KG C.A
STANDBY WATTAGE CONSUMPTION	0 W
WATTAGE MAX	2.800 W
VOLTAGE	220/230 SINGLE PHASE
FREQUENCY	50 HZ
PLUG	16 A
DRAIN TUBE DIAMETER	19 MM
IN-LET TUBE DIAMETER	8 X 1 MM
DISPLAY DIMENSIONS	4'3"
DISPLAY RESOLUTION	480 X 272
