

MILK MODULE

INTENSE FLAVOUR

With **Heylo's Induction Technology**, the beverages are made of only milk; you won't get any water delusion as we don't use steam! Our milk module develops a **Temperature Profile** while heating the milk; it helps to avoid any thermal impact, and with the right parameters, you won't get any burnt milk flavour.

TEXTURED MILK

Set the amount of milk and foam, either hot or cold, for preparing all kinds of milk-based beverages. Thanks to our **Air Texturing System**, you'll get a creamy texture for latte art.

AUTO ECO CLEANING

Once the automatic cleaning cycle finishes, our **Smart Liquid Sensor** will advise you if any sanitation liquid is left in the tubes. You can clean the entire circuit with biological detergents, and the inductors are removable to clean. Heylo's precise control allows limited milk wastage between deliveries and rinsing.

ENVIRONMENT-FRIENDLY

Froth plant-based milk like never before, and find the right flavour for your non-dairy alternative beverages! You can also deliver two types of milk using the same milk module. With the precise dosage of milk, there is better control of milk usage and less waste.

TECHNICAL DATA SHEET

MODULE DIMENSIONS	W:315MM * D:430MM * H:420MM
BOX DIMENSIONS	52 X 37 X 48 CM
NET WEIGHT	21 KG
PACKED WEIGHT	24,5 KG C.A
STANDBY WATTAGE CONSUMPTION	0 W
WATTAGE MAX	2.800 W
VOLTAGE	220/230 SINGLE PHASE
FREQUENCY	50 HZ
PLUG	16 A
DRAIN TUBE DIAMETER	19 MM
IN-LET TUBE DIAMETER	8 X 1 MM
DISPLAY DIMENSIONS	4"3"
DISPLAY RESOLUTION	480 X 272
